o   **Weekly Summary**

        This week we had our mid-semester meeting with the Senior Design instructor. We spent some time preparing our presentation and a demo video. From the presentation we received some positive feedback and confirmation we are on the right track. Besides that, we have just been continuing to make progress on the application. We are getting a physical server from the Prison's IT department, so we will soon be able to host our app on the actual server it will be running on.
